

NALAYATHIRAN

TEAM NAME : TECH QUARTET | TEAM ID : PNT2022TMID49460

PROBLEM STATEMENT

TITLE - Developing a Flight Delay Prediction Model using Machine Learning.

- **Flight delay is inevitable and it plays an important role in both profits and loss of the airlines.**
- **An accurate estimation of flight delay is critical for airlines because the results can be applied to increase customer satisfaction and incomes of airline agencies.**
- **This project proposes a model for predicting flight delay based on Deep Learning (DL). DL is one of the newest methods employed in solving problems with high level of complexity and massive amount of data.**

EMPATHY MAP

Dr.Malar

Name & Sketch

She treats every patients equally.

She is loyal to her work

Save Patients Lives

Behavior & Action

She provides good quality of treatment

Demographic & Psychographic Details

Age:26

Location:
Madurai

Income:
High Paid Salary

She is passionate doctor

Needs & Pain point

Alert System for delay

Accurate Tracking System for current location of flights

Scheduled operations will be affected

Delayed delivery of medical stuffs which affects patients

TEAM MEMBERS

- **JEYAPRASANNA S (TEAM HEAD) - 923819104017**
- **KARUPPAIYA I - 923819104020**
- **NAVEENKUMAR S - 923819104028**
- **VARUN KUMAR V - 923819104055**
